for a diverse, competent, and sustainable
Medicaid mental health workforce

Policy Title: All Payer Claims Database Independence

Challenge: The All Payer Claims Database (operated under state contract by CIVHC (https://civhc.org/get-data/co-apcd-info/) holds important data for the public and for research purposes to understand the economics and functioning of the health system.

Currently data requests to CIVHC can be overruled by HCPF, preventing access to important data about public spending on public health.

Proposal: Amend CRS _ to increase the independence of APCD/CIVHC and allow access to aggregate data, while protecting the privacy of individuals.

Fiscal Note: 0$
