for a diverse, competent, and sustainable
Medicaid mental health workforce

Policy Title: HCPF Stakeholder Meeting Requirements

Challenge: Colorado supports Medicaid mental health care through management by the state's Department of Healthcare Policy and Financing. HCPF creates rules that impact the providers and the consumers of mental health care. In this effort, HCPF properly obtains advice from stakeholder groups. When such meetings are in-person, the participants can know the size of the meeting and the participants in the meeting. In in-person meetings, a person asking a question or making a statement is visible.

Currently when HCPF meetings are online, the participants are not able to see who is participating, and are not able to see the size of the meeting. Participants are also unable to see questions that are being asked or know who is asking the question.

Proposal: Amend CRS _ to require that on-line meetings reproduce as much as possible the situation of an in-person meeting, where the participant list is visible and the Q&A features do not hide questions or hide the identity of the person asking the question.
