*Medicaid mental health workforce*

Policy Title: Managed Care Reporting

Challenge: Colorado supports Medicaid mental health care by contracting with managed care entities (MCEs) also known as Regional Accountability Entities (RAEs). These are United Healthcare, Anthem, and Colorado Access. Colorado provides around $1 billion to these entities to provide Medicaid covered services. There are monthly reports available to policy makers and the public that describe the premium dollars provided to the RAEs, by population category. There is no reporting however of how much of those premium dollars are spent, and how.

For information about the Medical Loss Ratio calculation data, see page 127 Section 10.0 of https://hcpf.colorado.gov/sites/hcpf/files/Colorado%20Community%20Health%20Alliance%20Amendment%201.pdf

Proposal: Amend CRS _ to include that managed care entities deliver a report detailing their care spend within two weeks of the end of each month. These reports shall include the Medical Loss Ratio data for the numerator and denominator categories, and also spending by population categories, mirroring the state's premium report.
